## BINGO

Instructions

Each $\mathcal{B I N G O}$ card is different. There are 25 cards to a pack. Start with regular $\mathcal{B} \operatorname{ANGO}$, all 5 squares across, diagonally, or down. Everyone gets a free square in the middle. Some cards have two squares with the word time; youget to pick one square per question. So if the answer is 'time'just mark one square. 'Housing'is a different answer than'House: 'Have a plan'is different from 'spending plan': When you see the answer on your board mark it with an $X$.

If you answer the question before I do, youget a piece of candy. First person or people (in case of a tie) to yellout "BINNGO"get a prize. Then stay with the same boards and do another kind of bingo. Here are some ideas. (*Note: Squares already marked can be used by participants towards the next $\mathcal{B I} \mathcal{N}(G O$ game)

4 Corners - Four outside corners of board
Double $\operatorname{Bingo}$ - $\mathcal{A n y}$ two traditional $\mathcal{B I} \mathcal{N} G O$ 's ( $\mathcal{A n y}$ combination of two rows across, diagonally, or down)
Picture Frame - Markallsquares on outer border
$\mathcal{B i g} X \quad \quad \mathcal{A l l}$ squares diagonally from upper left corner to lower right corner $\mathcal{A N} \mathcal{D}$ all squares diagonally from upper right corner to Cower left corner (to form an ' $X$ ')
$\mathcal{B i g} \mathcal{H}$ - $\quad \mathcal{A l l}$ 'B'squares vertically; $\mathcal{A l l}$ ' O 'squares vertically and the center forizontal row
Full Card $\quad\left({ }^{*} N o t e: y o u\right.$ will need a lot of prizes if you do this kind of $\mathcal{B I} \mathcal{N G O}$ as there will be a lot of winners)

Have fun-You will
